

iScore helps learning engineers evaluate AI

being used for auto-grading learner's writing

AI powered by
**large language
models (LLMs)**

Learners write
summaries
when reading a
digital **textbook**

Summaries are
auto-graded
by the AI
using LLMs

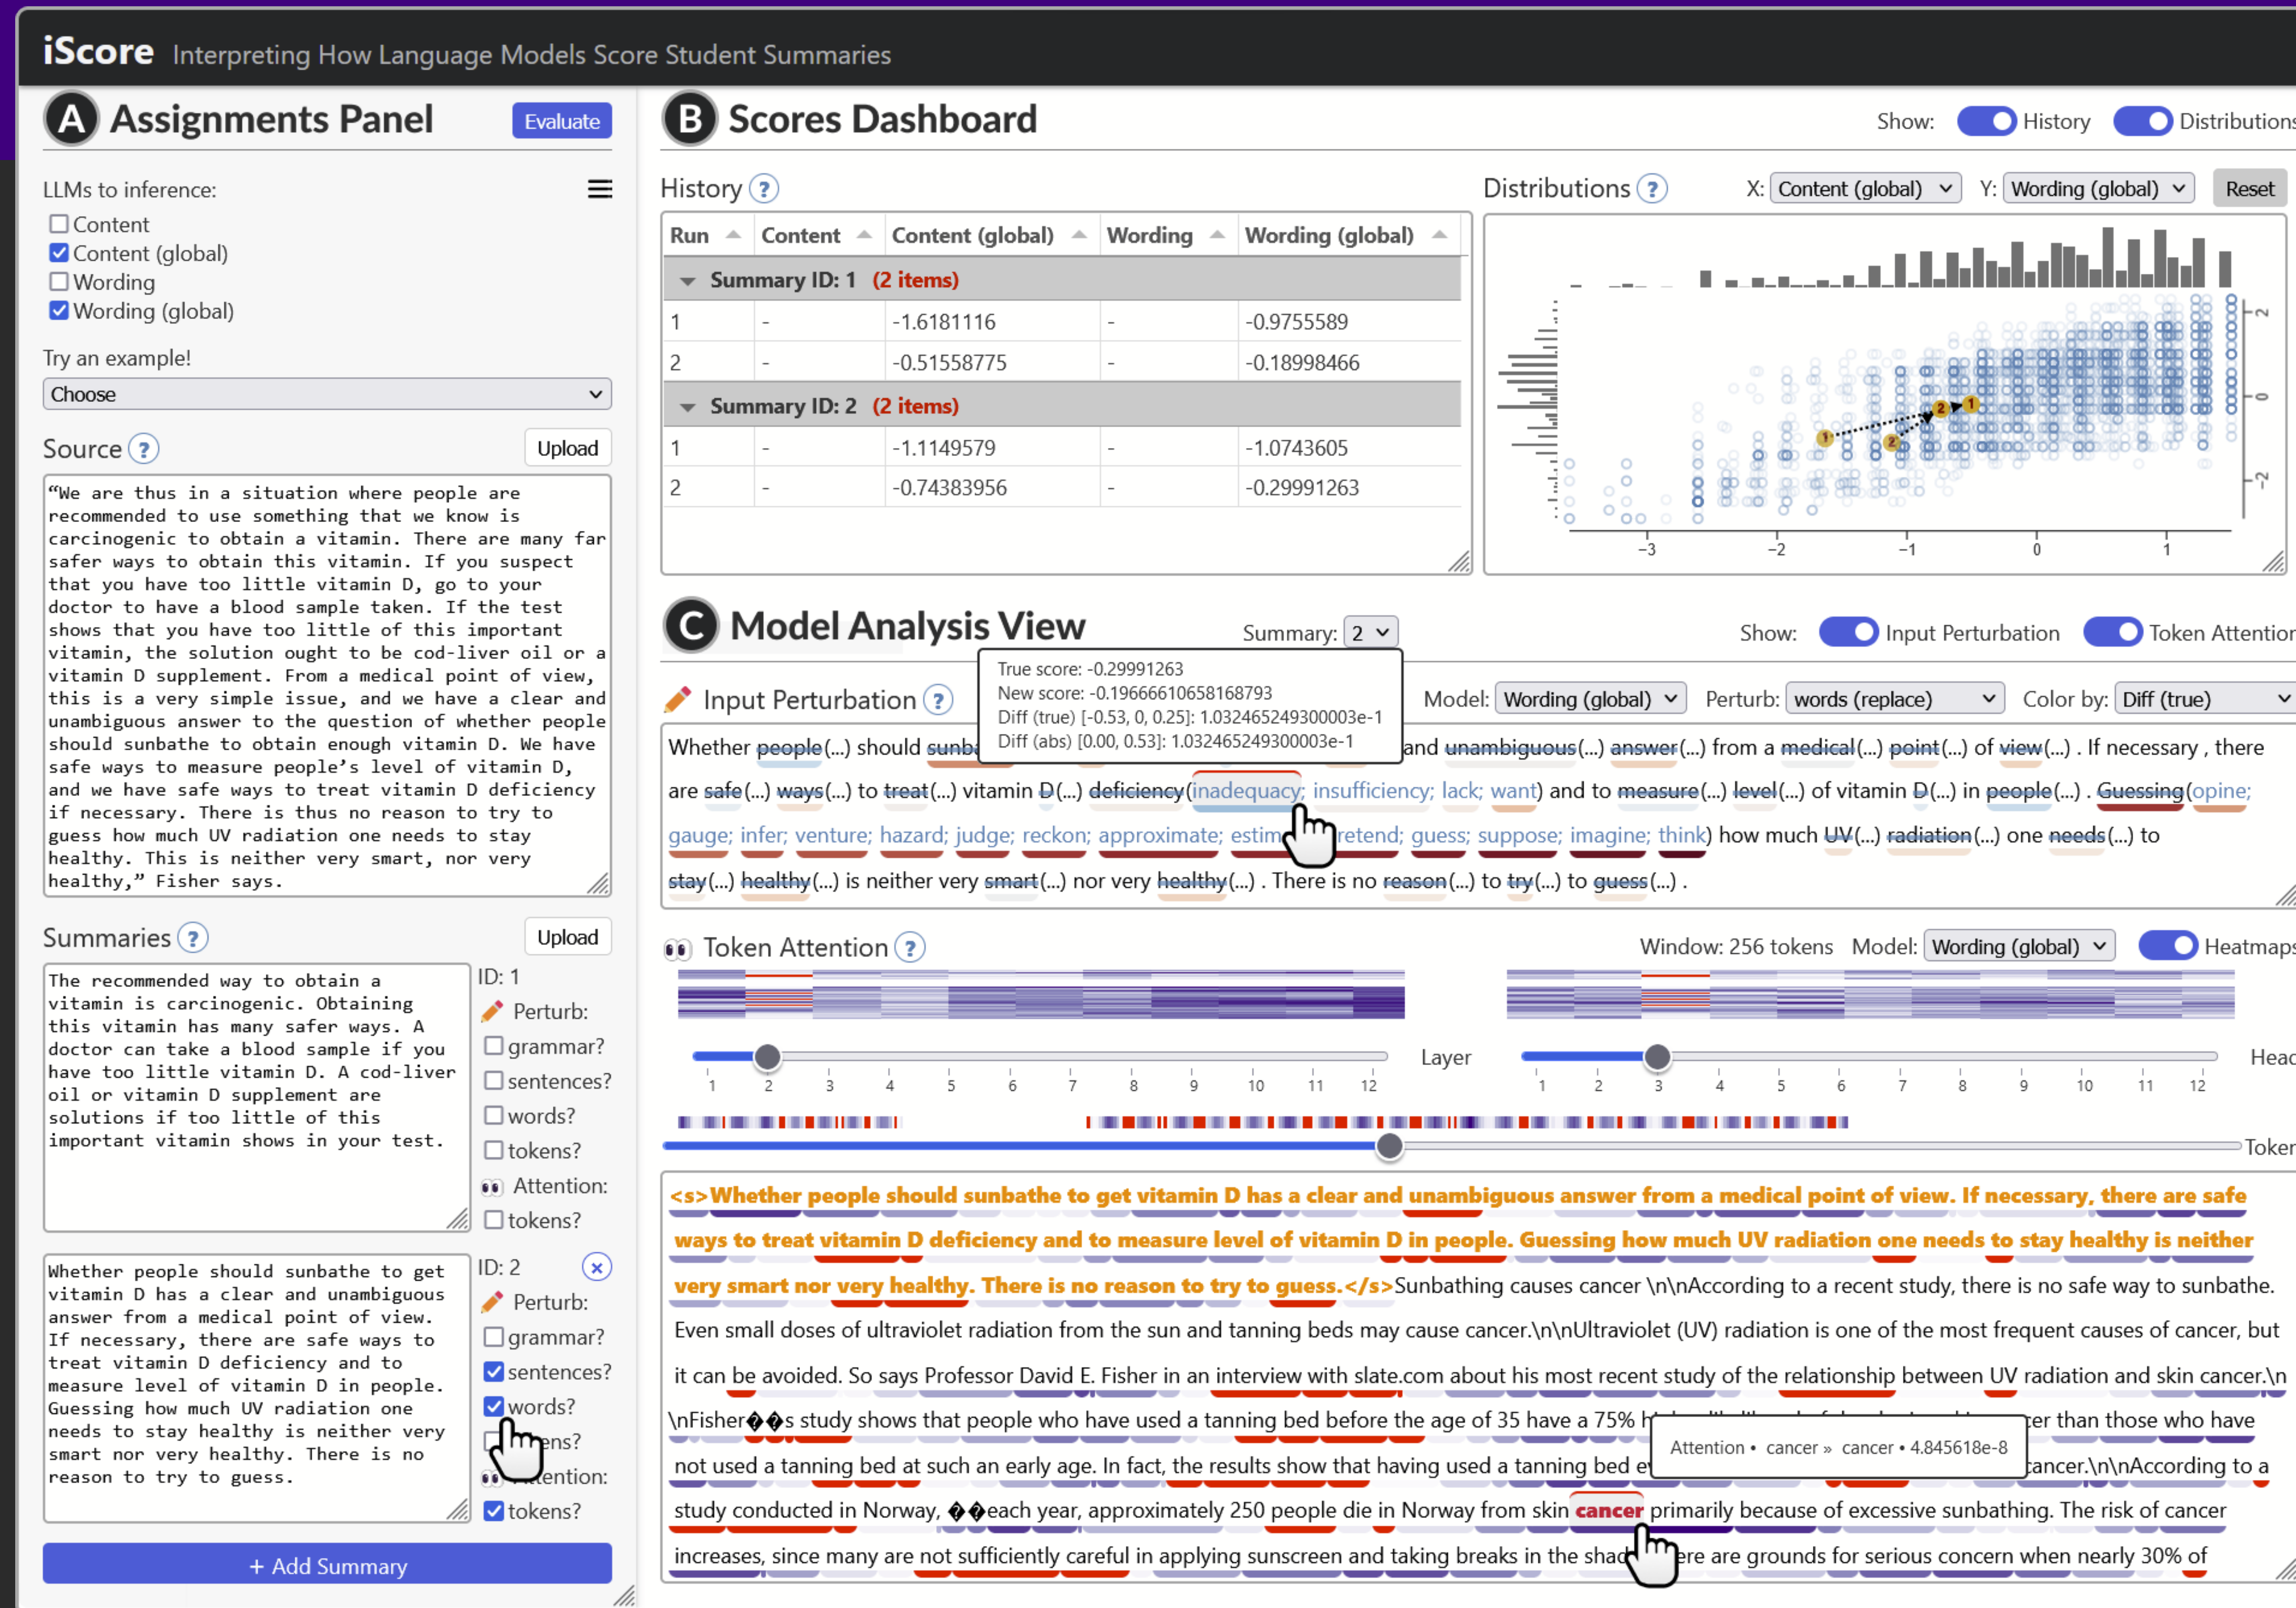

How to build
trust in
deploying AI in
the **classroom**?

Track **grades**
across **revisions**

Compare
expert-scored
examples
against multiple
summaries

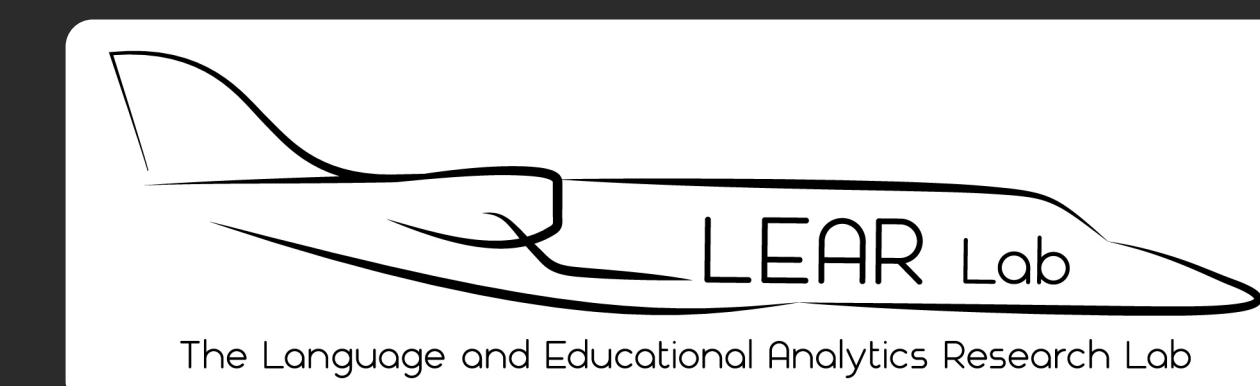

Automatically
update and
compare scores
when **revising**

Visualize the
internal
workings of the
AI model
